

About Me

Highly motivated 4th year Computer Engineering student (CGPA: 3.52/4.0), specializing in designing and developing robust, scalable backend architectures and intelligent automation solutions. Hands-on experience in Gen AI, Python, Java, Android Studio, Machine Learning, Computer Vision and Robotics demonstrated through award-winning projects. Proven leadership skills with 2 years of experience in managing creative & technical teams for Google DSC and IEEE.

Education

MPSTME, NMIMS University B. Tech Integrated Computer Engineering CGPA: 3.52/4	2024 - 2027
MPSTME, NMIMS University Diploma in Computer Engineering CGPA: 3.55/4	2021 - 2024
The Universal School Ghatkopar IGCSE: 87.86%	2021

Projects

Multi-Class AI Auto-Annotation & QA Pipeline - 2026

Architected a production-grade data pipeline using Docker, PostgreSQL, and Streamlit to automate complex computer vision workflows. By integrating a dynamic dual-engine AI architecture, the system batch-processes large-scale video frames to eliminate repetitive manual annotation tasks. A custom API bridge was engineered to seamlessly sync local data with Label Studio, enabling professional QA and real-time bi-directional annotation updates.

Continuous Active Learning & MLOps Sandbox - 2026

Designed a continuous MLOps pipeline utilizing FastAPI to manage edge-deployed vision-language models and automate their development lifecycle. The system features a real-time drift detection engine that flags performance degradation, automatically triggering a circuit breaker that initiates local QLoRA fine-tuning when accuracy drops below 75%. To resolve intricate technical edge-cases, the architecture integrates a multi-tier consensus verification system utilizing a Human-in-the-Loop (HITL) dashboard.

AI Pin - Wearable Voice Assistant Built on MSA for Ambient Intelligence - 2026

Built a wearable AI Pin powered by an ESP32-S3 handling I2S streaming and local buffering. Scaled an event-driven microservices backend using FastAPI, Docker, and RabbitMQ to pipeline real-time Faster-Whisper STT and multi-LLM processing. Optimized system fault tolerance with Redis caching, CQRS data synchronization, and automated hardware watchdog circuit breakers, achieving sub-100ms latency.

Gesto-Chair: Multi-Modal Assistive Retrofit - 2026

Architected a low-cost, non-invasive wheelchair retrofit platform using an Arduino Architecture to unify omni-modality based gesture control via Bluetooth, maintaining processing latency of under 200ms.

Gesto-Drive: Gaming by Hand - 2024

Built a real-time hand gesture control system using OpenCV and MediaPipe to translate physical movements into gaming commands via Python, and [published a paper at IEEE ICECER Madagascar 2025](#) on Gesto-Drive.

Work Experience

Jio Platforms Ltd (Summer Internship) - June 1, 2026 – July 10, 2026

As part of the Jio Partner World Connectivity Team, I streamlined and automated complex network workflows by integrating YOLO and QLoRA into the core telecommunications infrastructure, delivering measurable impact on real-time operational efficiency. Collaborated with cross-functional teams to deploy scalable object-detection models, enhancing system capabilities to support large-scale enterprise goals.

WhatCode

Freelance designed a responsive logo for a client, collaborated and coordinated with WhatCode Chief Strategist, Product Lead and UI/UX developers.

Certifications & Publications

Supervised ML: Regression and Classification - **Coursera**
Developing AI Applications with Python and Flask - **IBM**
Machine Learning Explainability - **Kaggle**

Google Skill Badges
DroneSystem 5-Day CORETECH Certification - **Samika Systems**
REST API (Intermediate) - **HackerRank**
Docker Essentials: A Developer Introduction - **IBM**
Power BI: Build Reports - **Coursera**

CORE SKILLS

Technical Skills - Computer Vision, Machine Learning, Artificial Intelligence, Microservices, Kubernetes, LLMs, PostgreSQL, FastAPI, RabbitMQ, Redis, CQRS, Docker, GenAI, Scikit-Learn, Supabase, ArcGIS, Ubuntu, ROS, GCP, ArduPilot, Mission Planner, Drone Piloting, Arduino, IoT, Adobe Creative Suite, Figma.

Soft Skills - Project Planning, Public Speaking, Teamwork, Collaboration, Event Logistics, Event Management, Design Team, Creative Content Creation.

Achievements and Positions of Responsibility

- Gesto-Drive - Paper published as the main author at the IEEE ICECER Madagascar 2025 conference
- Third Place - Tech Hackathon on Disability Inclusion by NMIMS Mirae Asset 2026: GestoChair
- First Place - NMIMS Polarizer 2024: QuadStreamCV
- First Place - TechSafar TechSkript 2025: GestoDrive
- Distinction - Google Developer Group Hyphen Ideathon
- Super Core - Chief of Creatives, Google Developer Group MPSTME
- Sub-Head - Digital Creatives, Google Developer Student Club MPSTME
- Sub-Head - Digital Creatives, IEEE MPSTME
